David León Salas

Software Engineer | Backend & Data Automation

Veracruz, Mexico (open to remote) • davidleonsalasdev@gmail.com • +52 229 177 9456 • DvLeu • dvleu.dev

Summary

Software engineer with a production track record shipping **Python** & **Java** Server-side applications on Amazon Web Services and Google Cloud Platform, **ETL** pipelines, and automation systems that eliminate manual bottlenecks. English B2 / Spanish native.

Education

Universidad Cristóbal Colón, M.S. in Data Science, Computer Science – Veracruz, Mexico — Sept 2026 – present

TecNM Instituto Tecnológico de Veracruz, B.S. in Computer Systems Engineering – Veracruz, Mexico — Aug 2021 – May 2026

- GPA: 3.6/4.0; active member of the Competitive Programming Club (CPC), practicing algorithms, data structures, and problem-solving under contest constraints.
- Competitively selected as institutional research intern to develop LNAP, an educational platform serving 90+ active students.

Experience

ScaleFlow Technologies, Software Engineer – Monterrey, Mexico — Aug 2026 – present

- Built authentication, role-based access and tenant isolation for PROFILE 7, a multi-tenant HR platform, using **FastAPI**, **PostgreSQL** Row-Level Security and **AWS** Cognito.
- Designed and deployed odin-api, a **Flask** service with an **OpenAPI** contract, JWT auth and **pytest** contract tests, connected it to PROFILE 7 on **AWS** (ECS, CloudFront, **Terraform**), and wrote its technical documentation.
- Integrated Stripe payments and designed data models with the business team for FixNow, an on-demand repair services marketplace (**Java**/Quarkus, **Kubernetes** on **GCP**).

Alvasu, Freelance Full-Stack Developer – Veracruz, Mexico — May 2026 – July 2026

- Designed and delivered an offline-first desktop application (**React**, **Flask**, **SQLite**, **Electron**) for internal operations, enabling local data ownership with zero cloud dependency.
- Built a date-effective cost calculation engine to track ingredient price changes, preserve historical recipe costs, and support profit analysis across production periods.
- Consolidated ingredient pricing, production logs, recipe management, sales records, and profit dashboards into a single workflow, reducing manual handoffs for the client.

TenarisTamsa, Data Engineer Intern – Veracruz, Mexico — Feb 2026 – June 2026

- Built **Python ETL** pipelines unifying 5+ heterogeneous data sources (CSV, XML, Access, **Excel**, **SQL**), reclaiming ~1 hr/day of analyst time previously lost to manual aggregation.
- Fixed a performance bottleneck, cutting a 30-min daily data collection task to under 10 sec (180× speedup) by deploying scheduled **Python** scrapers as standalone executables with structured logging for production-grade reliability.

NeoDigital, **Python** Backend Developer Intern – Veracruz, Mexico — Mar 2025 – Oct 2025

- Architected and shipped a production **FastAPI** + **MongoDB REST API** serving SAT fiscal catalogs using **async Python** and layered architecture, delivering a scalable and maintainable service running in production.
- Slashed catalog onboarding from hours to seconds by engineering **Excel** ingestion endpoints with **Pydantic** schema validation, blocking malformed records at the API boundary before reaching production.

Projects

Lnap — Educational Programming Tools – Veracruz, Mexico — Sept 2025 – Nov 2025

- Delivered two tools under an institutional research contract — an interactive programming visualization platform and a pseudocode-to-**Python** translator — adopted in live lectures and validated by 80+ first-semester students.

HealthMed Chat — Medical Diagnosis API – Veracruz, Mexico — Mar 2024 – May 2024

- Engineered a medical diagnosis **REST API** combining rule-based filtering and **KNN** scoring to return a ranked Top-5 differential diagnosis from patient inputs (age, gender, BMI, symptoms), with full session logging for accuracy analysis.

Skills

Languages: Python, **Java**, **JavaScript**, **TypeScript**, **SQL**

Backend & APIs: FastAPI, **Flask**, **Django**, **Spring Boot**, Spring Cloud, Quarkus, Hibernate, SQLAlchemy, Alembic, Microservices, **RESTful APIs**, **OpenAPI**, **async** systems, **Pydantic**, Stripe API

Testing: pytest, contract testing, test coverage

Databases: MongoDB, **PostgreSQL**, **Microsoft SQL Server**, **MySQL**

Infrastructure & Tooling: Docker, **Kubernetes**, **Git**, **CI/CD**, **AWS** (ECS, Cognito, CloudFront), **GCP**, Microsoft **Azure**, **Terraform**, **Linux** CLI, Shell Scripting

Frontend: React, **Angular**, **Electron**, **Jest**

Data & Analytics: ETL pipelines, **Power BI**, data automation, **Matplotlib**, **Plotly**

Practices: Agile/Scrum, Sprint Planning, Software Architecture

Certifications

Building Scalable **Java** Microservices with **Spring Boot** and Spring Cloud — Google Cloud (Sep 2026)

MongoDB Overview (Core Concepts & Architecture) and Reliability & Availability — **MongoDB** (Sep 2026)

Google Agile Essentials — Google (May 2026)

Django Application Development with **SQL** and Databases — IBM (Oct 2025)

Developing AI Applications with **Python** and **Flask** — IBM (May 2025)

Python for Data Science, AI & Development — IBM (May 2025)

Python Essentials 1 & 2 — Cisco (May 2025)

Samsung Innovation Campus — AI & Leadership, Samsung & UDEM (Apr 2025)
